

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph at page 1 of the English language translation, after the title:

Cross-Reference to Related Applications

This application is the U.S. national stage application of International Application Number PCT/FR2004/001664, filed June 29, 2004, which, in turn, claims the benefit of French Patent Application Serial Number 03/08042, filed July 2, 2003.

Amend the paragraph beginning at page 2, line 14, of the English language translation as follows.

A great many applications, and in particular in medicine, strive for significant glycolysis inhibition, at inhibitor concentrations weak enough to avoid any harmful effect on the patient. Accordingly, we are aware of one approach, known as the glycerol rescued hypoxia hypoglycemia (GRH) approach, designed to treat certain cancers and solid tumors (McCarty M. F., 2001, Med. Hypotheses, 56:286-289), and which in particular is based on two findings.
